Sample Quick Search: Results for bully* AND work*

Can limit results to Catalogue or Articles & More

Refine results by ... - format - language - subject - pub name - database - pub. date etc.
Databases

Library home page > Databases tab > select Human Resources & Management or type a database name

Find articles, reports, cases, etc. in thousands of sources

- **Web of Science** - multi-disciplinary scholarly journal literature
- **Business Source Complete** - worldwide business literature, etc.
- **ProQuest Business Collection** - worldwide business literature, etc.
- **Conference Board of Canada e-Library** – reports on economic trends, organizational performance and public policy
- **BestCase** - Canadian labour related case law
- **LexisNexis Academic** and/or **Factiva** - international news articles
- **Google Scholar** – multi-disciplinary, scholarly books & articles
Web of Science

Find scholarly journal articles across all disciplines

Option: Deselect discipline specific citation indexes for more targeted results.

* wildcard = searches for word ending variations i.e., work, workplace, etc.

**AND** = all of these words (usu. decreases # of search results)

**OR** = any of these words (usu. increases # of search results)
Sample Search Results from Web of Science

Not sure if a journal is peer-reviewed or refereed? Consult Ulrichsweb.

Profession or Industry Associations
Often identify current health & safety issues or trends in the field

• Use *Associations Canada* (book)
  – Available in **PRINT** at Innis Library (Reference)
    • Search the topical index in front of book to identify a relevant association
  – Also available **ONLINE** via [Canada’s Information Resource Centre](#) database

• Try **Google** (or another web search engine)
  – Type the word *association* along with terms that describe a profession of industry (e.g. nursing, mining, etc.).
  – Add a country or region (e.g., *Canada*) to the search if looking for information from a specific geographical area.
Sample Association Websites

Sample H&S Policies/Programs/Standards

Safety and Health

Protecting the health and safety of employees, contractors and communities is a fundamental component of TSM and deeply engrained in the Canadian mining industry's culture.

The Safety and Health protocol includes five indicators that concern occupational safety and health management at the facility level. These indicators have been designed to confirm whether facilities have established clear accountability for safety and health management and performance, that processes have been established to prevent the occurrence of all incidents, that all employees and contractors are engaged in the appropriate training to identify hazards, that performance is reported both internally and externally, and that facilities set targets for continuous improvement.
