Access to raw ESG data

The Refinitiv ESG database is built on publicly reported information to provide a holistic view of environmental social and governance indicators. Incorporating the standardized raw data into your analysis allows you to research with confidence.

Standardized data

We have the biggest ESG data analysis team in the industry, we ensure our data is standardized, comparable and reliable allowing you to research with confidence.

Materiality

The materiality of ESG data is hotly debated, you can develop your view of materiality, and incorporate it into your research, with the most granular ESG metrics, with the longest history.

Take a holistic or focused view on E, S and G

Broad ESG metric coverage across E, S and G allows you to dive into a specific pillar or theme to conduct analysis or create models/indicators.

Social metrics

Refinitiv offers the most comprehensive social data in the market, an advantage in light of the focus on the social responsibility of companies.

Environmental metrics

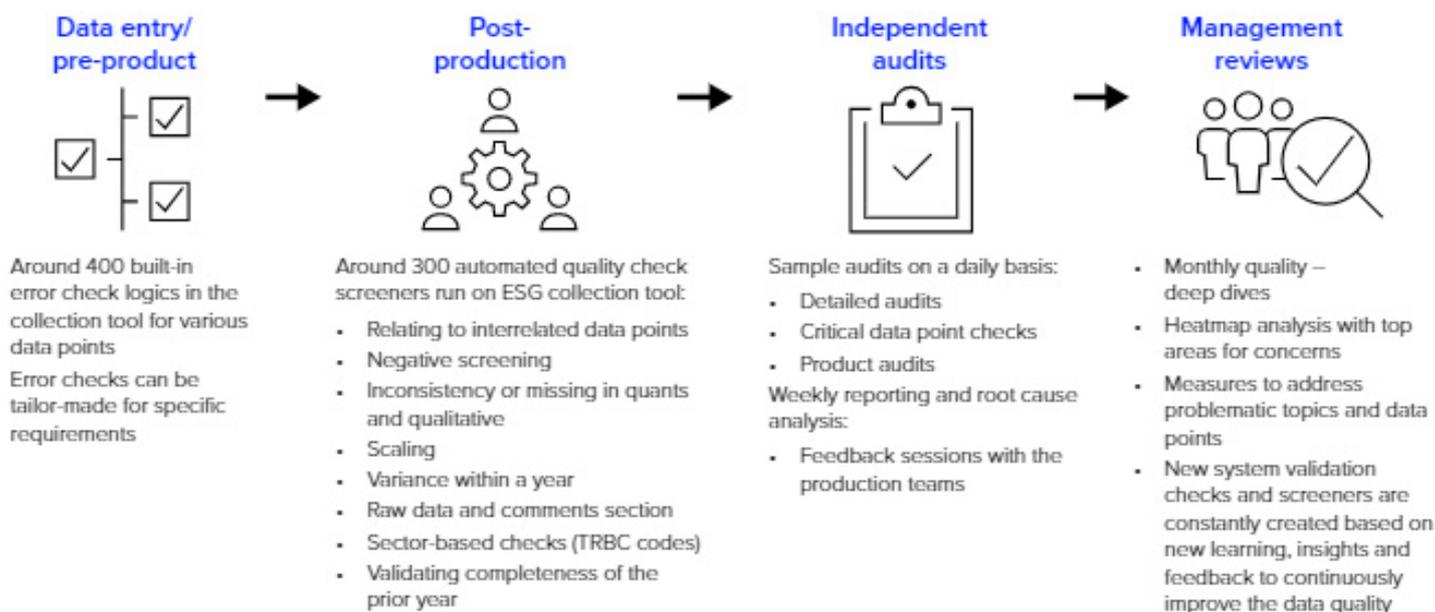

As carbon and emissions continue to be a focus of interest across many industries, we have the data which can help you create the methodology for indicators, reporting tools and analysis.

Incorporating ESG data

Combine Refinitiv datasets to rigorously test your hypothesis, Refinitiv ESG data can be easily mapped to other Refinitiv datasets including Datastream Equity Pricing and Worldscope Fundamentals.

Quality of data

Refinitiv ESG data is quality controlled and rigorously verified by a team of 150+ data analysts. A combination of automated system-based analytical checks and human expertise are used in providing reliable and trusted ESG data.
