The upsurge in mobile Hamiltonians is on the rise. Here are projections of where people and others will live, make purchases and how they will fare in 2011, based on estimates in growth provided by Environics Analytics.

It’s also a sneak peak at how those changes could affect the city.

How does your city grow?

The City, it’s changing. Hamiltonians may not see the biggest rate of growth in an upsurge of mobile communications on spending for personal equipment, such as high-tech toys.

That is a calculation that is becoming more apparent in the city of Hamilton. It is a city that is moving into an area of high density, with a higher rate of move-ins and move-outs than the average city. This is a city that is moving into an area of high density, with a higher rate of move-ins and move-outs than the average city.
