

“One Click” Echo Integration into Avenue

When you integrate your Echo360 course into the Avenue course shell, you are adding Echo360 as an External Learning tool to give your students direct access to the recorded lectures. This allows the students to have full access to the Echo360 course without having to create an Echo360 account. When they click on the integration link, they will automatically get logged into Echo with their MacID and will be able to use the in-class features inside Echo.

At the end of this document, there are some common questions and troubleshooting tips.

Integrating Echo360 into Avenue:

1. Log into Avenue and click on your course. Then click the “Content” tab.
2. Go to your Table of Contents and locate the “Add a module” text box.

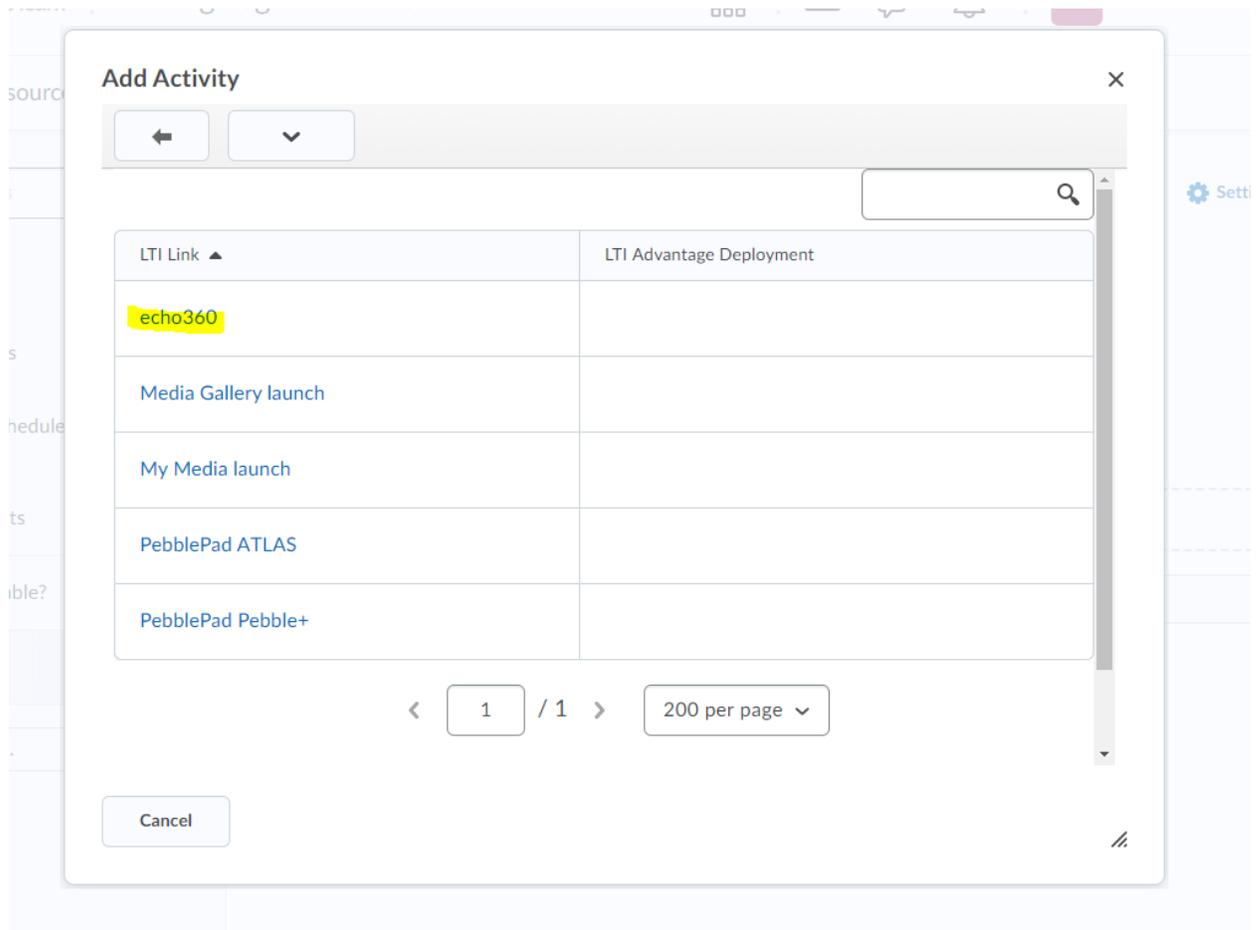

The screenshot displays the Avenue course shell interface for a course titled "Sawing Legs Off Tables". The top navigation bar includes "Content", "Resources", "Communication", "Assessments", and "PebbleP". The main content area is titled "Table of Content" and features a search bar, an "Import Course" button, and a "Bulk" button. A sidebar on the left contains navigation options: "Overview", "Bookmarks", "Course Schedule", "Table of Contents" (with a count of 3), and "What is a Table?" (with a count of 3). Below these is a highlighted "Add a module..." text box. The main content area lists several modules: "What is a Table?", "Identifying Tables in your E" (Flash File), "Testing Links to Anchors" (Web Page), and "Test for relative URLs".

3. Add a module where students can locate the Echo360 recordings. When finished, press Enter on your keyboard.
4. Click “Add Existing Activities: inside the new module, then click “External Learning Tools”

The screenshot displays a course management interface. At the top, there is a navigation bar with links for Content, Resources, Communication, Assessments, PebblePad, and Course Admin. Below this is a search bar labeled 'Search Topics' and a 'Print' button. The main content area is titled 'Echo360' and includes sections for 'Add dates and restrictions...', 'Add a description...', and 'Add a sub-module...'. A blue 'Upload / Create' button and a grey 'Add Existing Activities' dropdown menu are visible. The 'Add Existing Activities' menu is open, showing a list of options: 'Add MacVideo Media Quicklink', 'Assignments', 'Chat', 'Checklist', 'Discussions', 'External Learning Tools' (highlighted in yellow), 'Google Drive', 'OneDrive', and 'Quizzes'. A 'Bulk Edit' button is also present. On the left side, there is a sidebar with a 'Search Topics' field and a list of course items: 'Overview', 'Bookmarks', 'Course Schedule', 'Table of Contents' (with a count of 3), 'What is a Table?' (with a count of 3), and 'Echo360'. At the bottom of the sidebar is an 'Add a module...' input field.

5. Select "echo360".

6. An External Learning Tool will appear in your new module titled "echo360".

7. Click the External Link Tool.

If you are a new user, a course will automatically be created for you. It will most likely have a long name, but you can change that by going to "Settings" and changing the Section name. I recommended calling it the term the course will be taught in.

SAVE

If you already have an Echo360 account, then click the “Create new section” tab and type in the name of your section. To keep it more organized, I recommend calling it the term that the course will be running in. Then click “Continue”.

[Table of Contents](#) > [Echo360](#) > [echo360](#)

Connect your Echo360 Content

> Link to existing section content
> Link to existing section home page
▼ Create new section
Specify a section name below. Click "Continue" to create it. Sawing Legs Off Tables <input type="text" value="Winter 2020"/>
CONTINUE

8. You will now see your empty course shell. This is where your Echo360 recordings will be available to both you and your students. You can upload your own content, or if you are in an Echo enabled classroom a member of CCT can set up a schedule for automatic recordings.

Common Questions and Tips for Avenue Integration

Students and Instructors:

Q: "When I click on the Echo360 link in Avenue it takes me to a log in page."

A: This is most likely a browser issue. Echo360 has a list of recommended browsers and their settings:

<https://help.echo360.com/hc/en-us/articles/360035408871-Recommended-Browsers>

If you have any questions, please contact CCT at x22761 or at cct@mcmaster.ca
