**About our**

**CAMPUS ACCESSIBLE TECH SPACE**

We are located at L212 on the second floor of Mills Library near to elevator two, left of the LAS office through the keycard-accessible door.

In the fall of 2018, Mills Library opened the doors to our new Assistive Technology Lab which was named, Campus Accessible Tech Space (or CATS) shortly thereafter through a student naming contest. We seek to provide equitable resources, facilities, and services to foster dignity and independence for members of McMaster University.

Our CATS space is only available to students who have formally registered with SAS. While anyone is welcome to drop in during office hours, to ensure confidentiality, availability, and uninterrupted attention to your inquiries, we ask that you book an appointment by phone or email.

## 1. Albion Falls

---

Did you know that Hamilton claims to be the Waterfall capital of the world? Albion Falls is a huge 21 metre cascade waterfall that is viewable from a wheelchair.

Also, did you know that this waterfall was once considered as a possible water supply for the whole city?

## 2. Felker's Falls

At 22 meters, this ribbon waterfall is accessible in the Felker's Falls Conservation Area through a residential subdivision. Peter Street Trail is also wheelchair accessible in this same location!

## 3. Royal Botanical Gardens

With year-round indoor displays that can give you a tropical interlude in the middle of winter and loanable wheelchairs on site, the RBG is a great place to visit. Both indoor and outdoor areas are wheelchair accessible (with outdoor areas opening in late April to early May). There are usually exhibits to see and special student discounts, plus scented gardens and a licensed restaurant. There is so much to do between wetlands boardwalk exploration to rock gardens, it's worth a visit ... or many!

The Hamilton section of this stone dust trail travels through scenic Dundas Valley Conservation Area with rest area including indoor washrooms, a gift shop and even a snack bar.

## 5. Waterfront Trail

---

6m wide, paved and beautiful. Great for early morning trail-seekers and nearly 8km long. From the website it says that you can travel "Princess Point (Cootes Paradise) through Bayfront Park, Pier 4 Park, the Discovery Centre and on to HMCS Haida. You'll also find Williams Coffee Pub, a Waterfront Ice Cream stand and the Hamilton Harbour Queen Cruises nearby"

## 6. Pier 4 Park Trail

---

Gorgeous and picturesque, [Ontariotrails.com](http://Ontariotrails.com) describes it as "a multi-use asphalt trail 349 metres in length and 4 metres wide which provides barrier-free access to all areas of the park and linkages with the surrounding harbourfront precinct"
